Tin Hau, Hong Kong

Dear Martin,

I would personally like to thank you and the entire Function Eight team for the job your company has done building our web site to what it is today. We have enjoyed an excellent working relationship over the years and I can truly say that Function Eight has made our league significantly better than when we started doing business.

I look forward to working on future endeavours and if you have any ideas or suggestions for doing business we will certainly be interested in pursuing those opportunities. Thanks again for your great service and please make sure to tell the rest of the team we appreciate their fine efforts!

Best Regards
