Re: FunctionEight Reference

I am happy to provide this reference for the team at FunctionEight to reflect the outstanding job they have carried out in organizing and stabilizing our internal IT function. Stamfles Food Management is a subsidiary of Compass Group PLC, the world's largest contract food service company. In Singapore we have a workforce of over 400 staff of which around 25 are office based.

We engaged FunctionEight in June 2008 to manage our office IT systems whilst we went through a period of significant change. This included the completion of an acquisition where the management and retention of key information was critical to maintain our confidential data. As the company acquisition was completed FunctionEight ensured that our websites and e-mail accounts were all transitioned and protected. They also managed the security of our back office databases for HR and Finance.

During their period of management they successfully assisted in the implementation of our Navision finance database. Our strategy to position Singapore as the regional hub for South East Asia business required the implementation of a remote access finance system for our other locations around the region. They managed this through the set up of a Citrix server system and the changes were implemented smoothly and without disruption to our regular reporting cycle.

Since FunctionEight have been engaged as our outsourced IT team we have experienced a much improved level of internet downtime and e-mail reliability. We have found the staff of FunctionEight to be reliable, trustworthy and extremely professional. I have no hesitation in recommending their services as a great value solution to managing your IT systems.

If you would like additional information about FunctionEight, you can telephone me at +65 9618 5969.

Faithfully,
